**B) Reading Comprehension ( 16 Marks )**

**Read the following text carefully then answer the question below:**

Did you know that heating and cooling can change objects? Some changes can be **reversed**, which means the object can go back to the way it was before it was heated up or cooled down. Other changes cannot be reversed, which means the object cannot go back to how it was before it was heated up or cooled down.

Water can go through reversible changes when it is heated or cooled. When water is heated up, it starts to boil, and then turn into water vapour. If you collect the water vapour and cool it down, it will turn back into water. When water is cooled down a lot, it will turn into ice. If you heat the ice back up, it will turn into water again.

Have you ever watched someone cook an egg? Eggs go through a change that cannot be reversed when they are heated. When the liquid egg white is heated, **it** turns into a solid. If you let the egg cool back down, though, the egg white will not turn back into a liquid.

**a) Choose the correct answer from a, b, c and d :(6x2=12 marks)**
