VI- READING COMPREHENSION: (80 Marks)

Read the following passage carefully, then answer the questions below:

People think children should play sports. Sports are fun, and children stay healthy while playing with others. However, playing sports can have negative effects on children. It may produce feelings of poor self-esteem or aggressive behaviour in some children.

According to research on children and sports, 40 million children play sports in the US. Of these, 18 million say they have been yelled at or called names while playing sports. This leaves many children with a bad impression of sports. They think sports are just too aggressive. Many researchers believe adults, especially parents and coaches, are the main cause of too much aggression in children's sports. **They** believe children copy aggressive adult behaviour. This behaviour is then further reinforced through both positive and negative feedback.

Parents and coaches are powerful teachers because children usually look up to them. Often these adults behave aggressively themselves, sending children the message that winning is everything. At children's sporting events, parents may yell insults at other players or cheer when their child behaves aggressively. As well, children may be taught that hurting other players is acceptable, or they may be pushed to continue playing even when they are injured.

In addition, the media makes violence seem exciting. Children watch adult sports games and see violent behaviour replayed over and over on television. As a society, we really need to face up to this problem and do something about it . Parents and coaches should act as better examples for children. They also need to teach children better values. They should teach children to enjoy themselves whether they win or not. It is not **necessary** to knock yourself out to enjoy sports. Winning is not everything. In addition, children should not be allowed to continue to play when they are injured. Sending a child with an injury into a game gives the child the message that health is not as important as winning. If we make some basic changes, children might learn to enjoy sports again.

Experts agree that long-term exposure to high levels of noise pollution affects our health in many ways. Some researchers have documented that regular exposure to noise above 110 decibels can result in permanent hearing loss. VI- READING COMPREHENSION: (80 Marks)

Read the following passage carefully, then answer the questions below:

Did you know that some people don't do their reading assignments? It's shocking, but it's true. Some students don't even read short texts that they are assigned in class. There are many reasons for this. **They** may be distracted or bored. They may be unwilling to focus. They may be unconfident readers. Whatever the reason, it has to stop today. Here's why.

Reading stimulates your mind. It is like a workout for your brain. When people get old, their muscles begin to deteriorate; they get weaker, and their strength leaves them. Exercise can prevent this loss. The same thing happens to people's brains when they get older. Brain power and speed decline with age. Reading strengthens your brain and prevents these declines.

You can benefit from reading in the near-term, too. Reading provides knowledge. Knowledge is power. Therefore, reading can make you a more powerful person. You can learn to do new things by reading. Do you want to make video games? Do you want to design clothing? Reading can teach you all this and more. But you have to get good at reading, and the only way to get good at something is to practise.

Read everything that you can at school, regardless of whether you find it interesting or not. Reading expands your vocabulary. Even a "boring" text can teach you new words. Having a larger vocabulary will help you better express yourself. You will be able to speak, write, and think more intelligently. What's boring about that?

Do not just discount a text because it is unfamiliar to you. Each time you read, you are exposed to new ideas and perspectives. Reading can change the way that you understand the world. It can give you a broader perspective on things. It can make you **worldlier**. You can learn how people live in faraway places. You can learn about cultures different from your own. Reading is good for your state of mind. It has a calming effect. It can lower your stress levels and help you relax. You can escape from your troubles for a moment when you read, and it's a positive escape.

The benefits of reading far outweigh those of acting like a fool. So, do yourself a favour: the next time you get a reading assignment, take as much as you can from it. Squeeze it for every drop of knowledge that it contains. Then, move on to the next one.

A) From a, b, c and d, choose the correct answer: (6 x10= 60 Marks)

Owning a cat is quite popular in many countries all over the world. For millions of people, cats are their favourite pets. People sometimes forget, however, that owning a cat is a big responsibility. First, owners should have time as they need to feed, care for and clean up after their cats. They must also make sure their cats get enough exercise. In addition, cats need to be taken to the vet regularly to make sure they are healthy. Finally, owners have a responsibility to train their cats, so they know how to behave around people. Cats are beautiful animals, and they deserve responsible owners who look after them properly.

VI-READING COMPREHENSION: (80 Marks)

Read the following passage carefully, then answer the questions below:

Did you know that some people don't do their reading assignments? It's shocking, but it's true. Some students don't even read short texts that they are assigned in class. There are many reasons for this. They may be distracted or bored. They may be unwilling to focus. They may be unconfident readers. Whatever the reason, it has to stop today. Here's why.

Reading stimulates your mind. It is like a workout for your brain. When people get old, their muscles begin to deteriorate; they get weaker, and their strength leaves them. Exercise can prevent this loss. The same thing happens to people's brains when they get older. Brain power and speed decline with age. Reading strengthens your brain and prevents these declines.

You can benefit from reading in the near-term, too. Reading provides knowledge. Knowledge is power. Therefore, reading can make you a more powerful person. You can learn to do new things by reading. Do you want to make video games? Do you want to design clothing? Reading can teach you all this and more. But you have to get good at reading, and the only way to get good at something is to practise.

Read everything that you can at school, regardless of whether you find it interesting or not. Reading expands your vocabulary. Even a "boring" text can teach you new words. Having a larger vocabulary will help you better express yourself. You will be able to speak, write, and think more intelligently. What's boring about that?

Do not just discount a text because it is unfamiliar to you. Each time you read, you are exposed to new ideas and perspectives. Reading can change the way that you understand the world. It can give you a broader perspective on things. It can make you worldlier. You can learn how people live in faraway places. You can learn about cultures different from your own. Reading is good for your state of mind. It has a calming effect. It can lower your stress levels and help you relax. You can escape from your troubles for a moment when you read, and it's a positive escape.

The benefits of reading far outweigh those of acting like a fool. So, do yourself a favour: the next time you get a reading assignment, take as much as you can from it. Squeeze it for every drop of knowledge that it contains. Then, move on to the next one.

- a) short texts

4. Students fail to complete reading assignments because:

- a) They are getting old.
- b) **They get distracted or bored.**
- c) They acquire large amount of vocabulary.
