Module 1Unit 3Grade Eight(General)Reading ComprehensionDate: / / 201

Read the following passage, then answer the questions below:

Twenty-five years ago, communication between people was very different from communication today. To call friends quickly, we used a telephone to ring them. If time was not important, we wrote a letter and sent <u>it</u> by post. For fast written communication, people sent faxes. Although many people still use these ways of communication, they are becoming less <u>widespread</u> because of the new technology. Today, the most common forms of personal and business communication are mobile phone calls, text messages and e-mails. Many people now use smart phones with computers which can connect to the Internet and send e-mails.

In the future, the only thing that we can be sure of is that technology is not going to stand still. Scientists are going to continue inventing new, more complex ways of communication. Some experts predict that the next big development will be in visual communication. Small mobile computers with fast Internet connections will probably be the first mobile devices that give us high-quality visual communication, so that we can see the people we are talking to. Further in the future, who knows what will happen? By the year 2023, scientists predict that we will be able to send text messages by the power of thought. A special helmet connected to our brain will turn what we are thinking of into a digital form enabling us to communicate to other people that we know.

Module 2 Unit 6 Grade Eight (General) Reading Comprehension Date: / / 201

Read the following passage, then do as required below:

Jerry was the kind of person you can never hate. He was always in a good mood and always had something positive to say. He was a unique manager and had several waiters who had followed him around from restaurant to restaurant. **They** followed Jerry because of his attitude. He was a natural motivator. If an employee was having a bad day, Jerry was there telling the employee how to look on the positive side of the situation.

Seeing this style really made me curious, so one day I asked Jerry, "How can you be a positive person all of the time?" Jerry replied, "Each morning I wake up and say to myself, Jerry, you have two choices today. You can choose to be in a good mood or to be in a bad mood.' I choose to be in a good mood. Each time something bad happens, I can choose to be a victim or to learn from it. I choose to learn from it. Every time someone comes to me complaining, I can choose to accept their complaining or to point out the positive side of life. I choose the positive side of life."

Jerry added. "Life is all about choices. You choose how you <u>react</u> to situations. You choose how people will affect your mood. You choose to be in a good or in a bad mood. Finally: It's your choice how you live life."

Finally: It's your choice	how you live life."	, and the second	_
