Reading Comprehension

C) Reading Comprehension Read the following passage then answer the questions below:

Sushi originates in a Southeast Asian dish, known today as "salted fish". It is stored in rice for possibly months at a time. It is a very well-known dish all over the world. Fermentation of the rice **prevented** the fish from spoiling; the rice would be discarded before consumption of the fish. This early type of sushi became an important source of protein for its Japanese consumers. The term *sushi* comes from an old grammatical form no longer used in other contexts, and literally means "sour-tasting"; the overall dish has a sour taste.

Vinegar began to be added to the preparation of sushi for the sake of enhancing both taste and preservation. In addition to increasing the sourness of the rice, the vinegar significantly increased the dish's long preservation, causing the fermentation process to be shortened and eventually abandoned. The early types of sushi were developed in Osaka, the seafood and rice were pressed into a shape with wooden (typically bamboo) shape.

The common ingredient in all types of sushi is vinegar *sushi rice*. Fillings, toppings, and preparation vary. Sauce can be added and it's called wasabi. **It's** added as a topping. This dish is now one of the most famous meals and it is served all over the world.

II- Reading Comprehension

Read the following passage then answer the questions below:

Hundreds of years ago, it was possible to use natural material for making our clothes. Both plants and animals supply us with these materials such as wool, cotton, silk, leather and fur. Wool was used for making clothes because it was the most common material for making clothes in Europe.

Cotton has been used for three thousand years to make clothes especially in warm countries. The cloth made from cotton plant is very soft, cool and comfortable. In the past, cotton clothes were so expensive that only rich people could buy them.

In the twentieth century, scientists could make artificial materials for making clothes. Nylon and polyester are well known examples. These are much better than natural ones in many ways. For example, they are cheaper and easier to wash. In addition, they last longer and can be mixed with cotton and wool to produce a cloth that looks natural and easy to take care of.

Nowadays, clothes are made in modern factories. These factories make many styles for all people. Some factories make special clothes, like sports clothes or ones for firemen. Now, all types of clothes are available at the markets.
