- 7- Don't trust all fast-food restaurants; their food can sometimes make you **seriously** ill.
- 8- We need to make more efforts to protect the natural **habitats** of rare animals and plants.

B-Reading Comprehension: (16 Marks)**Read the following text then answer the questions below:**

Among the Islands of the Philippines, there is a tiny island named Maligaya. Its name means "happy". About fifty years ago, 100 families lived on this island. However, they were not happy! For half of the year, their island was dry and yellow; there was too little water to grow plants on the island. The other half of the year, there was too much water. Seasonal rains **turned** the soil into mud. The mud would slide into the ocean, sometimes taking houses with it and causing a serious catastrophe for the people of the island.

A man named Lino lived on Maligaya. He was a vet, doctor for animals. Lino had a field in front of his office. He started planting trees there. On Saturdays, he went to the mainland to get more little trees. The villagers thought Dr. Lino was crazy because it was difficult to get the trees to the island. However, **they** respected and helped him. Lino's field of small trees grew to a small forest of 40,000 trees.

Dr. Lino explained a reason for wanting the trees: there was so little food for animals like cattle to eat. The villagers could then feed the leaves to their animals. Soon, every family was able to keep one or two cows because of Dr. Lino's trees. Over the years, the island itself changed. The trees grew, and the people kept planting more. The mudslides and the destruction of houses also stopped.
