B- Reading Comprehension (16 Marks)

- Read the following passage carefully, then answer the questions that follow:

When you walk on sand, you leave footprints behind you. Then the wind comes and covers your footprints. But there is no wind on the Moon and no rain. There is no air and no weather. So, the footprints of the first people on the Moon are still there today.

Those men are famous now. Their names are Neil Armstrong and Buzz Aldrin. They climbed out of their spaceship and stood on the moon on 20th July 1969. They looked around and saw no living things. The ground was dark grey and dusty, and the sky was black. They could see Earth in the sky. **It** was blue and white.

Then they started to walk on the Moon. They were in heavy spacesuits, but they could walk and jump easily. They could move six meters with each step. It was easy because everything on the Moon is lighter than on the Earth. Things are lighter because there is less gravity. This is because the Moon is smaller than the Earth.

Armstrong and Aldrin spent only three hours on the Moon, but their footprints will **probably** stay there for hundreds of years.

A. From a, b, c and d, choose the most suitable answer: (6X2=12 Marks)

09. The best title for this text would be:

- The First People to the Moon**
- Travelling to Space
- Gravity on Earth
- The Weather on the Moon
