## B) Reading comprehension

### Read the following passage carefully, then answer the questions below:

Every day there is less and less space on Earth for trash to be buried. Yet, every day we make more and more trash and waste that have negative effect on the natural environment. What can we do? We can recycle some of our trash. Recycling means that the trash will be made into something new and useful that can be used again and again.

Recycling helps the Earth in many ways. It saves space in trash dumps where trash is collected to be burnt. Half of everything that we put into dumps could be recycled instead of throwing it. In fact, most things which are made of paper, metal, aluminum, glass and plastic can be recycled. It also **reduces** pollution.

Paper can be grouped up and made into new paper. Steel and aluminum cans can be melted down and made into new cans. The same is true about glass bottles. This can be done over and over again. Recycling doesn't take as much energy as making these things the first time. So, by recycling we can use less of the Earth's fuel resources. **It** also helps save our natural resources such as wood and metals.

Plastic can be melted down, too. Then, it can be formed into park benches or furniture. Some people call plastic the wood of the future. Things made of plastic will last about 400 years even when they are outside in harsh weather. No wood can do that.

### A) From a, b, c and d choose the right answer:

1) What is the main idea of paragraph (4)?

- a) What recycling is.
- b) How to save the future.
- c) Why plastic is important.
- d) How to recycle different things.

2) What is the **meaning** of the underlined word “**reduces**” in paragraph (2)?

- a) lowers
- b) helps
- c) uses
- d) improves

3) What does the underlined word “**it**” in paragraph (3) refer to?

- a) fuel
- b) time
- c) energy
- d) recycling

4) Plastic is called the wood of the future because:

- a) it’s a natural material.
- b) it helps save money.
- c) it is strong and beautiful.
- d) it can be used to make furniture.

5) According to the text, **one** of the following statements is **NOT TRUE**:

- a) All trash and waste can be recycled.
- b) Harsh weather doesn’t affect plastic.
- c) It’s difficult to find space for trash.
- d) Glass and metal can be recycled many times

6) The **purpose** of the writer is to tell us that:

- a) All materials on earth are useful.
- b) Planting trees helps in recycling.
- c) Recycling is a good way to use trash.
- d) Steel and aluminum can be recycled easily.

**B) Answer the following questions:**

7) What kind of materials can you find in your house that can be recycled?

.....

8) Why is recycling important to the environment?

.....
