#### **Reading Comprehension**

## **Read the following passage then answer the questions below:**

Organic food is very **popular** these days. It can also be very expensive. Some organic food costs twice as much as non-organic food. Parents of young children, and even some pet owners, will pay high prices for organic food if they think it's healthier. But many others think organic food is just a waste of money.

There is one main difference between organic and non-organic food. Organic farms do not use agricultural chemicals such as pesticides that stop insects from damaging crops. In many countries, foods that claim to be organic must have special labels that guarantee they're grown organically.

Some people think organic also means "locally grown", and originally this was true. But over time organic farming has become big business, with many organic foods now being grown by large agricultural companies that sell their products far from where they're grown. Processed food made with organic ingredients has also become more popular. At first, only small companies produced these products. But as demand overtook supply, big food companies that had been selling non-organic products for many years also began selling organic products. Small organic food companies found it difficult to compete with these big companies, and many didn't stay in business much longer.

Is organic food safer and more nutritious? This is an important part of the debate. Many farmers and consumers believe it is. <u>They</u> think agricultural chemicals can cause serious illnesses like cancer, but there isn't much evidence proving this is true. However recent studies have shown that eating organically-grown produce reduces your chances of developing heart disease.

## **Reading Comprehension**

**Read the following letter carefully then answer the questions below:** 

Dear Tom,

I was happy to receive letters from you and your sisters this morning. Good news to know that you and your sisters are well and enjoying school again after the long break. Yes, indeed! It is hard to believe that you are in Grade Eight. How time flies! You mentioned that you are rather worried about being in Grade Eight. Well, since you want me to advise you, I shall do my best to give you some tips. I used <u>them</u> years ago when I was in the same grade, and I must say they really helped me. So, here's my secret to success.

First, read through each unit of your textbook **beforehand**. This will prepare you for the day's lessons. Listen carefully to your teachers. Do not get distracted by chatting with friends. To ensure you are paying attention during lessons, make your own notes as the teacher teaches. You can ask questions when you do not understand. Second, complete all homework given on time. Do not delay as homework has a way of piling up. Doing homework can give you more practice with new knowledge so that you can understand it. Sometimes it is a good idea to study with your friends, in groups. Peer teaching makes learning fun and helps you understand information easily.

Finally, make a timetable to ensure you use your time properly. You should include in your timetable enough time for meal, exercise and sleep. Remember to eat a good, balanced diet and have sufficient sleep. Yours cousin

#### **Reading Comprehension**

**Read the following passage and then, do as required:** 

Learning something new can be a scary experience. One of the <u>hardest</u> things I've ever had to do was to learn how to swim. I was always afraid of the water, but I decided that swimming was an important skill that I should learn. I also thought <u>it</u> would be a good exercise and help me to become physically stronger. Also, it would make me a more confident person.

New situations always make me a bit nervous, but the trainer was very patient. He taught me to concentrate on my arms and my legs. I felt hopeless. Sooner than I imagined, however, things began to feel "right", and I was able to swim and shoot across the water.

Learning to swim was not easy for me, but in the end my persistence (اصرار) paid off. Now when I am faced with a new situation, I am not so nervous. I know that as I practise being in that situation, I will feel more comfortable. It is a wonderful feeling when you achieve a goal you have set for yourself.

#### Read the following passage carefully then answer the questions below:

Once, there were two little mice. One of the mice was a very hard worker. Every morning, she would go outside and fill her basket with beans and nuts. If she was feeling sick, she would still gather food.

The cousin of the hardworking mouse was the opposite. She slept half the day, played and ate her beans and nuts. Soon she <u>realized</u> and became aware of the fact that she would not have any food left for the long winter. She went to her hardworking cousin and asked for food. "Why don't you have any food," the hardworking mouse asked. "I've been busy playing and sleeping", the lazy mouse said. "Well, here's a basket, stop being lazy and gather some food for yourself," said the hardworking mouse.

While the lazy mouse was gathering food, she came across a grasshopper playing happily in the fields. "Hey mouse," said the grasshopper. "Come and play with me instead of wasting your time gathering food! "I only have a few days to collect food," said the lazy mouse. "You should be gathering <u>some</u> too." "Oh please," said the grasshopper. "I have <u>plenty</u> of grass, corn and leaves, I'd rather have fun. "The lazy mouse said goodbye and continued to gather her own food.

#### **Reading comprehension**

# Read the following text, then answer the questions below:

Have you ever heard the sound of a hummingbird? طائر الطنان? They make a buzzing noise when they fly. They make this noise because they beat their wings so fast. They fly in a unique way. They move their wings so fast that they can hover بحوم in the middle of the air, like a helicopter. Sometimes they hover upside down. They are the only birds that can fly backwards.

Hummingbirds are small. The bee hummingbird, which is a type of hummingbirds, is the smallest bird in the world. It is just a little bit bigger than a bee. Bee hummingbirds build tiny nests.

Hummingbirds move fast. It takes lots of energy to move as fast as they do. This means they need to eat a lot of food. They have to store enough food energy to survive through the night. Their favourite food is nectar, a sweet liquid found in some flowers. Hummingbirds don't use their long beaks for drinking nectar, they use their tongues. Their long tongues work like little pumps. They visit hundreds of flowers daily.

Hummingbirds help flowers too. They get pollen on their heads when they feed. Flowers use pollen get from one flower to the nake seeds. Hummingbirds help pollen get from one flower to the next. This helps flowers make more seeds. More seeds mean more flowers. More flowers mean more food for hummingbirds. Isn't it nice how that works out?

#### **Reading Comprehension**

## **Read the following passage then answer the questions below:**

Fast food restaurants are almost everywhere in big city. In some places you can stand in a line and get a beef burger in a paper bag, in others you can pick up a tray of fish, chicken, pizza or even Mexican or Chinese food and in some fast-food places you can even drive your car up to a window and wait for your turn to get your order. A few minutes later, a worker passes you the food through the window and you can drive away and eat it in your car.

In many big cities all over the world, fast food restaurants are open every day. But why do people prefer fast food restaurants to more comfortable restaurants where you can sit quietly at a table and watch the world go by?! There are many reasons make fast food restaurants popular. <u>They</u> are the speed and price. People's time is valuable. They do not want to waste a lot of time eating or preparing food. The prices are inexpensive as well. Because of large numbers of meals sold everyday costs are kept low.

On the other hand, many people think that fast foods are not healthy because they contain too much salt, carbohydrates and fats. But one thing is sure, people everywhere prefer eating fast foods because they find it tasty and also <u>economical</u> way to eat.
