B) Reading Comprehension (16 Marks)

Long time ago, the world was very warm. Rain fell on land all the time. In that warm world lived strange animals called dinosaurs. They were the biggest animals that ever lived on Earth. In those days there were no people so no man has ever seen them. Scientists found their bones under the ground. **They** said that some dinosaurs lived near water and some were on dry land. Some dinosaurs could fly and live on the top of mountains. They found out that some of them ate only plants, just like horses and cows; others ate animals as lions and tigers. Some dinosaurs were bigger than any animal we have ever seen.

The most dangerous dinosaurs were called tyrannosaurs. They ate animals and were very big and tall. They were as tall as big buildings and look over a top of a tall tree. Their teeth were as long as a man's hand. After millions of years, something strange happened. They suddenly began to **disappear** and pass away.
