5. Why did the ancient Greeks and Egyptians go without shoes most of the time?

What makes shoes comfortable nowadays?

B. Reading Comprehension (16 Marks)

Read the following passage carefully then answer the questions below:

Shoes—we wear them nearly every day. Yet we hardly think about them because they are such an ordinary part of our daily lives. The ancient Greeks and Egyptians made and wore sandals, but actually went without shoes most of the time. These people lived in areas where the weather was fine, and shoes were not needed to keep their feet warm.

In ancient Egypt, the first shoes were simple sandals to protect their feet from rough surfaces. The easiest way to make shoes in these ancient times was to use materials that were available, including tree leaves and grasses.

Centuries later, the Romans wore sandals much like the Egyptians did. They used pieces of leather to make them. Some Roman sandals had straps, like belts, wrapped around the ankles. Shoemakers often dyed these sandals in bright colours that represented the jobs done by the people wearing them. Women wore brown sandals with moon-shaped stones on the back. The nobles wore red sandals. Officers wore white sandals. Soldiers wore heavy leather sandals that were more like boots but with uncovered toes!

Shoes have come a long way since the ancient Egyptians created their first sandals. Nowadays, companies are designing different types of shoes for different purposes. Many more types of soft materials such as rubber and canvas are used, and shoes have never been more comfortable for feet. Even so, it is interesting that the sandals, crafted by the Egyptians more than four thousand years ago, still are very similar to shoes we wear today.

a. Choose the correct answer from a, b, c and d: (6 x 2= 12 Ms)
