

Grade 12 SetBook

Unit One

- 1. How can you define law? What is law?**
Law is a set of rules that govern the society.
- 2. Setting strict laws is very essential (important) for societies. Discuss.**
Without laws there will be no justice. There will be no safety in the country. Crimes are more likely to increase in countries that don't enforce strict laws.
- 3. How can we enforce laws in the society?**
The government should set penalties and punishments to punish those who break the law.
- 4. What is the basic principle of all laws?**
A person is innocent until proved guilty.
- 5. Give examples of illegal actions.**
Dealing in drugs, drinking alcohol, murder, theft, physical and psychological abuse, etc
- 6. Where did Kuwait draw its laws from?**
Kuwait drew its laws from the teachings of the Holy Quraan.
- 7. In what way are computer crimes different from ordinary crimes? Why is it difficult to solve computer crimes?**
Techno-criminals are invisible and it's almost impossible to prove their crimes. On the other hand, criminals in ordinary crimes are visible and there is usually physical evidence to prove their crimes.
- 8. Give examples of techno-crimes.**
Identity theft, bank account theft, hacking, online harassment...etc
- 9. Why is techno-crimes on the increase?**
Because the number of people using the computer and the internet is increasing.

10. Suggest ways to prevent computer crimes?

We should improve security of our online information by inventing new methods of online confirmation. We should change the passwords of our online accounts every now and then. We must not post any secret information online, such as bank account details or ID numbers. The government must set harsher punishments on techno-criminals.

11. What is meant by culture of blame?

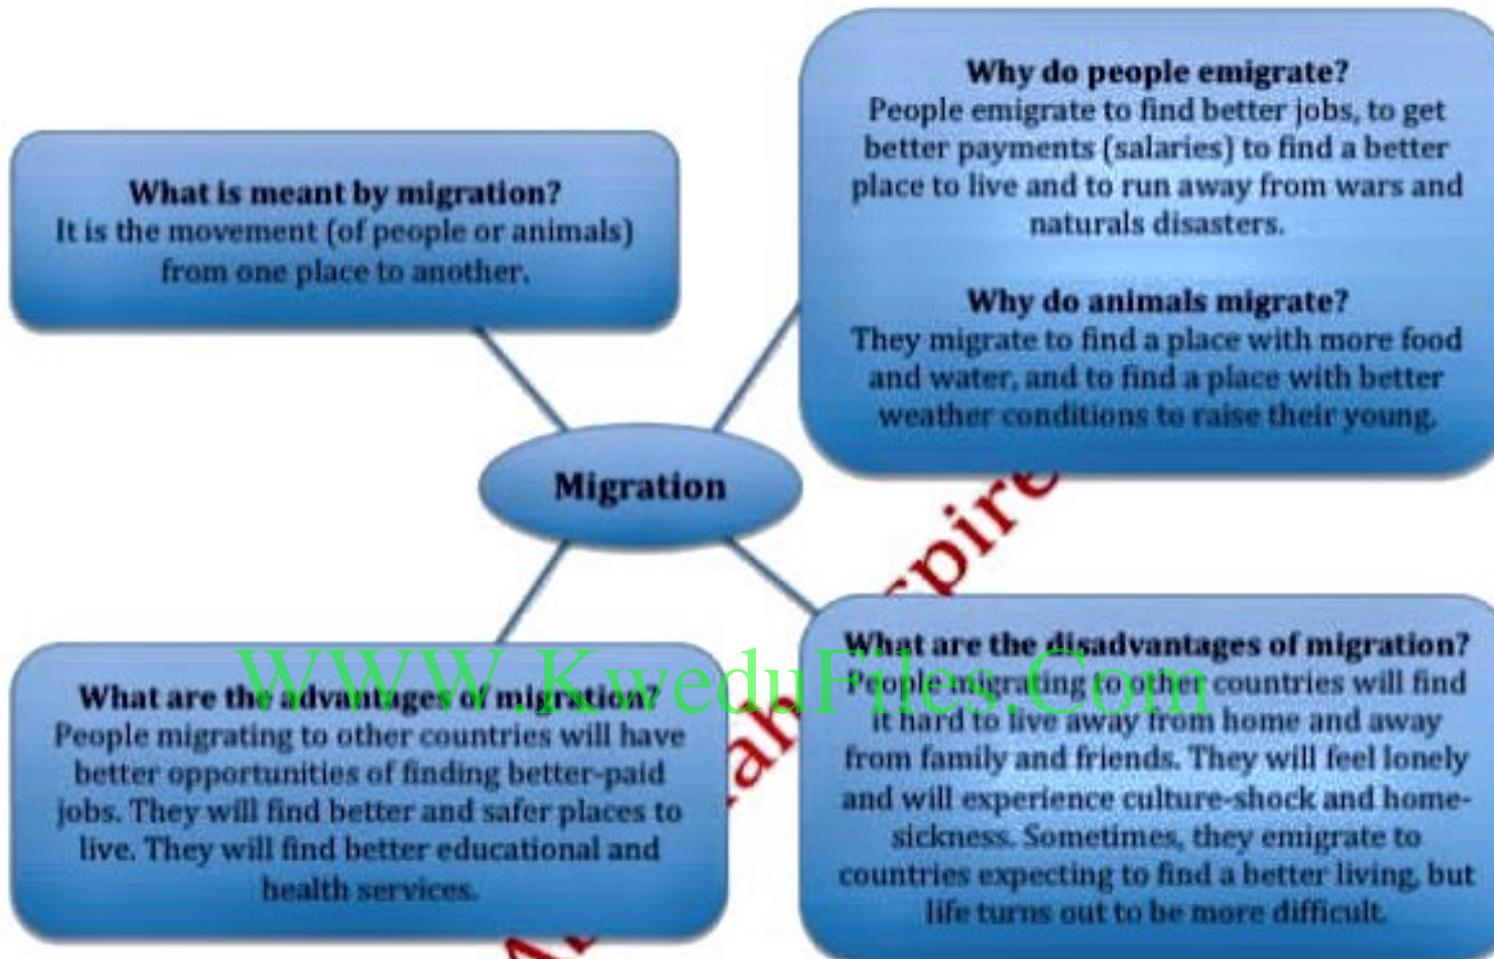

people tend to find somebody to blame instead of taking responsibility of their actions

12. Are you for or against more litigation in courts? Do you agree or disagree with solving minor issues in courts? Why?

Unit Two

1. Meaning / advantages / disadvantages / reasons:

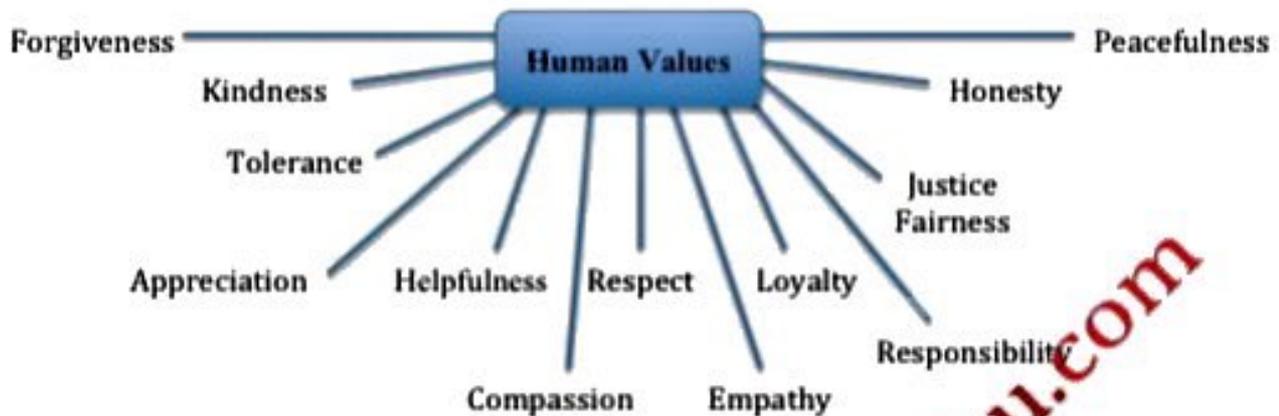

2. How do animals know where to go when they migrate?

Some scientists think that animals have an inner compass inside their heads. Other scientists thinking that some animals use the sun and stars to find their way.

Unit Three

1. Give examples of some human values.

- 2. What are human values? How can we define human values?**
They are human principles and good manners we should follow.
- 3. Give examples of human values and identify their meanings.**
Respect is treating people in a good way. Compassion is sympathy towards someone's suffering. Forgiveness is the ability to forgive people who did something wrong to us.
- 4. How can we express compassion and empathy in the society?**
We can express compassion and empathy by donating money to the poor, helping in building hospitals and providing jobs and residence for those in need.
- 5. Why do many countries have important legislations? How are legislations important?**
Legislations are important because they protect the people in the country, help in raising good people and good citizens and provide peaceful living.
- 6. How does Islam teach us important human values?**
It teaches us to respect Laws, to be peaceful to one another and to express compassion by helping others.

7. **What is the job of volunteers involuntary work?**
They work wherever they are needed, for example they distributed food and aid to needy families and participate in raising awareness in schools and universities. In addition they provide Basic health care systems and participate in rescue operations outside Kuwait.
8. **What are the qualities of a volunteer? What qualities make a good volunteer?**
Volunteers should be dedicated, courageous, helpful, compassionate, and find pleasure in helping others without any reward.

Unit Four

1. **Meaning / Causes / effects / solutions.**

2. **What is deforestation?**

It's the cutting down of trees.

3. **How does deforestation influence the climate and the population?**

Cutting trees plays a major part in causing desertification and global warming. So, many people will migrate to find a better place to live.

Dalal Al-Abu

www.kwedufiles.com

Unit Five

- 1. What do we mean by recycling?**
Processing objects and materials to be used again.
- 2. How can we solve the problem of rubbish in Kuwait?**
By burying the rubbish, burning it or recycling it.
- 3. Why are some items not recycled?**
Some items are too expensive and too difficult to be recycled.
- 4. How can you help in recycling your household wastes?**
Take the items that can be recycled to the special collection points.
- 5. Governments nowadays are taking the issue of recycling very seriously. Discuss.**
Earth is running out of resources and out of places to bury the wastes. Therefore, recycling is becoming very important. It can help us save the environment, reuse the items again and reduce pollution.
- 6. Why is it important to recycle paper?**
Recycling paper saves water and electricity. It is less harmful to the environment than burying paper or burning it.
- 7. What is Kuwait's role in recycling paper?**
Kuwait built a recycling centre in partnership with a private company and a university.

Unit Six

- 1. How can we protect rare animals like pandas?**
Stop hunting them, put them in nature reserves and stop deforestation and the destruction of their natural habitats.
- 2. What important role do plants play in the environment?**
They provide nourishment, enrich the soil, protect the soil from erosion, produce oxygen, they provide medicine, oil, perfumes, waxes, fibres and fuel.
- 3. How does Islam discourage cutting trees?**
Our prophet said that if a person grows a tree allowing animals and people to eat from it, will receive recompense from Allah.
- 4. What is meant by land reclamation?**
It means burying lands from the sea to be used for residence and different projects.
- 5. Are you for or against land reclamation? Why?**
I am **for** land reclamation because it offers spaces for people to use as residential areas. It provides lands to be used for projects to attract tourists.
I am **against** land reclamation because burying the land damages the environment and destroys sea life.

Focus On

- 1. Why is Al-Arfaj considered to be Kuwait's national flower?**
It was chosen as Kuwait's national flower because of its historic significance.
- 2. What benefits can we get from Al-Arfaj?**
It was used as a natural medicine, as a source of bedding and firewood, and as a food source for sheep.
