Millions of years ago, the world was very warm. Rain fell on the land all the time. In that warm world lived strange animals called dinosaurs. They were the biggest animals that ever lived on Earth. In those days there were no people. So, no man has ever seen them. Scientists have found their bones under the ground. They said that some dinosaurs lived near water and some were on dry land. They found out that some of them ate only plants, just as horses and cows, and others ate animals as lions and tigers. Some dinosaurs were bigger than any animal we have ever seen.

The most dangerous dinosaur was called Tyrannosaurus. It ate all animals and was very big and tall. It was as long as a big building, and could look over a top of tall tree. His friend Ali said, "Everyone is cleaning the park today, would you like to help?" Nasser said, "sure" and asked for a garbage bag.

Nasser started to help his friends cleaning the park. He picked up empty bottles, papers and juice pouches. After an hour, he filled 3 bags. When everyone was finished, one of the teachers loaded the bags into a truck, and took them away. The park looked clean.
