Sharks are amazing animals that live in the ocean. They are known for their sharp teeth and **powerful** mouths. Sharks have different shapes and sizes, the largest is the whale shark and the smallest is the dwarf shark. They all have a simple shape and strong muscles that allow them to swim very fast. They don't have bones like other fish; instead, their bone skeletons are made of cartilage.

Sharks are one of the oldest kinds that have been living in the oceans for millions of years. Sharks are excellent hunters with a great sense of smell that helps them find their food easily.

Scientists found that sharks are not careful eaters. They eat fish, seals, and other sharks! Some sharks like the whale shark eat sea turtles and dolphins. **They** also found that not all sharks are dangerous to humans. In fact, most sharks are not interested in hunting humans at all.

Sadly, sharks are in danger today. So, it's important for us to save these wonderful animals. We should stop fishing them or damage their homes.
