- Read the following passage carefully, then answer the questions that follow:

These days, more and more children suffer from obesity. A name for being extremely overweight is obese. Why is this happening? Doctors, teachers, and other experts believe that children are not getting the right amount of exercise and are not eating the right kinds of food. In the past, children used to be more active. There was a lot of work to be done. Children helped in the housework. **They** didn't have much time to sit around. Nowadays, children go to school and come home to watch the television or play video games. Too many of their activities involve sitting and not being active enough. Children are not getting enough exercise, such as running, walking, or riding a bike.

Another main reason for obesity in children is the types of food they eat. More and more families are eating at restaurants or fixing quick meals that are full of high calories. These types of food begin to add up day after day. Children are eating too many of the wrong foods and not enough of the right ones.

Some of the foods that children should be eating include fruits, vegetables, dairy, grains, cereals, meat and poultry. These types of foods can help children **maintain** their weight and help the body fight disease. Children need to be taught about the foods they eat and the food choices they make.
