c-many

d-few

32-There are only ..... people interested in the subject..

a- few

b-many

c-little

d-much

33-How ..... students have a computer at home?

a-little

b-much

c-many

d-few

## ✓ Health is wealth

As we all know about the popular and common saying that “Health is Wealth”. It is as true as our life. Good health keeps us always happy and gives us feeling of complete physical, mental, social well-being. A good health keeps us away from the diseases and health disorders. The loss of good health causes loss of all happiness.

A good health helps us to live a good, balanced and healthy life. Our good health needs fresh air, clean water, proper sunlight, balanced diet, away from junk food, clean and healthy atmosphere, greenery environment, morning walk, personal hygiene, proper education, etc.

Healthy food at proper time is very necessary for the healthy body which is possible only through the well-balanced diet. It promotes the proper growth and development of our body which keeps us mentally, physically and socially healthy. We should always remember that we need proper food, water, air, physical activity, sleep and rest on daily basis.

## ✓ Respect

It is certainly true that public show unsociable conduct and disrespect to others these days. There are several reasons for this problem, and various measures can be taken by governments, individuals, parents and schools to improve the situation.

This problem may be caused by a variety of factors. The first reason is that there are many problems in the family such as serious conflicts between parents, poverty and no role model for the children. For instance, children brought up with single parent may not have good respect to others. The second reason is that poor educational completion and unemployment could lead people to misbehave with their peers.

The best way to solve this problem would be parents have a critical role in teaching their children the difference between right and wrong, and giving them the confidence to grow up to be proud of themselves and their family.

In conclusion governments and individuals should tackle the problem by educating the offenders. If these measures are taken, there will be some change in the people who are misbehaving with their counterparts.

### ✓ Computer games

Nowadays, technologies have developed a lot. And computer is one of the most developed devices. Computer has become a major source of fun and entertainment for lots of people. Many people spent their time playing games but it is a problem when we keep playing and we don't stop playing.

One common effect of video game addiction is isolation and withdrawal from social experiences. Video game players often hide in their homes or in Internet cafés. The effect of this isolation can lead to a breakdown of communication skills and often a loss in socialization

The reason why I think computer games are bad is because they can be harmful to our health. When we play a computer game, we look at the screen, just click a mouse and don't move. If we keep looking in the bright screen without resting our eyes, our eyes will be damaged. Also if we don't move and sit still in a chair, our waist will be hurt.

Those were the reasons why I think computer games are bad. Now, I will tell you how we can prevent addiction to computer games.

So, when we decide to play games, we should decide how much time we will spend for games. Second, while you are playing games, take a rest. It is a good idea to have a rest after 30 minutes. Rest your eyes and waist and walk around the room. This will prevent our eyes from hurting and it will feel good for you.

### ✓ The importance of sports

Playing sports and games continuously means motivating the mental and physical growth. It makes us learn about how to maintain the physical and mental balance as it improves the concentration level and memory. It makes life too peaceful to tackle any difficult situation. It develops sense of friendliness and removes all the differences between two people. It keeps body in shape which makes us strong and active however it also keeps mind peaceful which brings positive thoughts and keeps us away from the many diseases and disorders

It gives us lots of energy and strength as well as removes all the tiredness and lethargy by improving the blood circulation all through the body and promoting the physical and mental well-being. It improves ones capability, work efficiency and prevent from being exhausted mentally and physically. It is the integral part of improving the quality of education among students. Sports and education both together are the best ways of achieving success in life.

## ✓ Saving the wild

Animals play an important part in our environment. They help maintain the balance in nature. Today many animal species, however, are in danger of extinction. The reason causing the decrease in the number of animals is mainly from human beings. It is high time we must take some measures to protect endangered animals.

Firstly, we should educate people from the young age about the importance of wild animals in maintain the ecosystem and biodiversity. Young people should be educated how to protect our environment in general and how to protect endangered animals in particular. They should be told about the things that threat the safety of wildlife so that they can avoid doing them. This should be included in their curriculum at school.

Secondly, the governments all over the world should set up national parks and wild-life preserves as many as possible. Thanks to these places, animals will have a suitable habitat to survive and good conditions to grow and multiply. There they can be kept in a natural and safe environment.

Last but not least, each nation must enforce stricter law with more serious punishment- capital punishment, for example- to prevent people from poaching rare and valuable animals. In general, protecting wild animals is not a person's work but it needs the solidarity of human beings all over the world. I should think each of us has the responsibility for protecting and saving endangered species before it is too late."
