8. When I was walking along the beach, I **suddenly** heard a scream.

II- READING COMPREHENSION (16Marks)
Read the following text carefully, then answer the questions below:

Water is everywhere around us. Water can be solid, like ice; liquid, like what we drink; or gas, like steam from a hot pot. Think about how ice turns into water when it melts, and how water turns into steam when **it** gets hot.

We need water to stay healthy. It helps our bodies get the right temperature and carries useful things to all the parts of our bodies. Water also helps us throw away things our bodies do not need.

Plants also love water! They **take** it up through their roots and use it to make their own food. Imagine if you were a plant and you could make your own snacks!

There is a lot of water on our planet. We have big oceans, rivers, lakes, and even icy mountains. But guess what? Most of the water on Earth is salty, like the water in the sea. Only a little bit of it is fresh and good to drink.

Water does some amazing actions to the land too! It helps make rivers, lakes and even covers big mountains with green plants. All living things on earth need water to stay alive. If there was no water, there would be no life on earth.

A) Choose the correct answer from a, b, c and d: (6 x 2= 12 Marks)

9. What is the **best title** for the passage?

    a)   Healthy Life
    b)   Big Mountains
