## READING COMPREHENSION

Read the following passage carefully, then answer the questions that follow:

Although not the longest river in America, the Rio Grande is one of the most important. But, unlike other significant rivers, it is not used for shipping. In fact, oceangoing ships cannot navigate the waters. Now, what makes Rio Grande so important is its location. Since 1846, it has been the official border of Texas and Mexico.

The Rio Grande is either the fourth or fifth longest river system in North America. It all depends on how it is measured. Because the river twists so much, it occasionally changes course. And these course shifts can cause it to be longer or shorter. At its last official measure, the Rio Grande clocked in at 1,896 miles. The river starts in Colorado and extends downward to the Gulf of Mexico.

Downward is the best way of describing it too. Not only does the river extend south, but it also starts in the mountains and gets lower and lower in elevation as it extends to the Gulf. Rising as a clear, snow-fed mountain stream more than 12,000 feet above sea level in the Rocky Mountains, the Rio Grande descends across steppes and deserts, watering rich agricultural regions as it flows on its way to the Gulf of Mexico.

Its name is Spanish for the “Big River,” but the Rio Grande is known as Rio Bravo in Mexico. “Bravo” translates as **“furious,”** so the name makes sense. Because of its twists and turns, it certainly does seem to be angrier than most rivers!

The Rio Grande today is mostly used as a source of drinking water. Sadly, much of the water has been drained from the river. Parts of the river are almost dry! This is because people use more water from the river than the river can get back from rain and other sources. Experts are working to correct this, though, with hopes of restoring the river to its past strength.

Today, the river is important as a source of water for Texans and Mexicans. More important, it is a symbol of cooperation between two nations. Though borders like the Rio Grande separate nations, **they** are also shared spaces. The Rio Grande is therefore a symbol of friendship and peace between two peoples.

**A. From a, b, c and d choose the correct answer:**

1- Which of the following can be the most suitable title for the passage?

- a- **The Rio Grande**
- b- Taxes and Mexico
- c- Rivers in America
- d- The Shortest River

2- The underlined word "**furious**" in the 4<sup>th</sup> paragraph is closest in meaning to:

- a- dry
- b- **angry**
- c- large
- d- twisted

3- The underlined word "**they**" in the 6<sup>th</sup> paragraph refers to:

- a- spaces
- b- nations
- c- **borders**
- d- people

4- According to the passage, **ONE** of the following statements is **NOT TRUE**:

- a- The Rio Grande is known by two different names.
- b- The Rio Grande flows south and from high elevations.
- c- The Rio Grande is a symbol of cooperation between two nations.
- d- **The Rio Grande is a source of drinking water for most of the United States.**

5- The Rio Grande has endpoints in

- a- Texas and Mexico.
- b- New Mexico and Colorado.
- c- Texas and the Gulf of Mexico.
- d- **Colorado and the Gulf of Mexico.**

**B- With reference to the passage, answer the following questions:**

6- Why is the Rio Grande so important?

**Because it is the official border between Texas and Mexico.**

7- How have parts of the river become dry?

**People use more water from the river than it receives from rain and other sources.**

8- What is the reason for not using the river for shipping?

**Because oceangoing ships cannot navigate its waters.**

9- How does the position of the Rio Grande in terms of length vary between fourth and fifth?

**Because the river twists and changes course, making it sometimes longer or shorter.**

=====

**SUMMARY MAKING**

**Read the following passage, then do as required:**

Chocolate is one of the most popular snacks in the world. It is a key ingredient in many foods such as milk shakes, candy bars, cookies and cereals. Chocolate is a product that requires complex procedures to produce. First, chocolate production starts with harvesting cocoa in a forest. Then, the cocoa pods are kept in trays under the sunlight to dry for approximately eight days. After that, the cocoa seeds are shipped to chocolate factories. Finally, the factories blend the cocoa with sugar and milk to add flavours. Chocolate is ranked as one of the most favourite flavours in many countries.

**In a paragraph of FOUR sentences ONLY, summarise and paraphrase the previous passage in answer to the following question:**

**How is chocolate produced?**

**First, people collect cocoa from the forest. Second, the cocoa pods are fried under the sun for about eight days. Third, the cocoa seeds are sent to chocolate factories. Finally, the factories mix the cocoa with sugar and milk to produce chocolate with different flavours.**

## VI- READING COMPREHENSION: (110 Marks)

**Read the following passage carefully, then answer the questions below:**

One of the biggest and most expensive transportation projects in the world is bridge building. Bridges are important links that carry cars, trucks, and trains across bodies of water, mountains or other roads. As a result, **they** have to be strong so that they won't fall or collapse.

Bridge collapses can be tragic events, leading to loss of life and serious property damage. That's why bridge engineers, designers and builders must always take their jobs very seriously. The best way for them to prevent these accidents is to understand why bridges collapse in the first place. Understanding bridge collapses can lead to major changes in the design, construction, and safety of future building projects.

There are many reasons why bridges fall, which may be either due to their design or to external factors. Historically, more bridges were made of wood and were much more sensitive to fire. This was particularly true of old train bridges that would sometimes catch fire and burn to the ground. Besides, a large number of bridge accidents occur during the construction of the bridge itself. These accidents are often due to an error made by the engineers, such as a miscalculation. The bridge collapses under its own weight, and this can be deadly for the workers on it at the time. Additionally, earthquakes damage all structures, including bridges. Luckily, this kind of collapse is relatively **infrequent**, especially with modern bridges. Engineers have learned to design bridges in earthquake zones in areas that are much more resistant to movement. Moreover, some bridge collapses are mysteries, and engineers only realise the reasons after they complete their research. In some cases, this could happen because low-quality material was used in the construction, or because of a problem in an important part of the bridge. In other cases, the bridge was designed only to support a certain amount of weight and no more.

As for external factors, bridge collapses can be due to boat or train crashes. Both kinds of accidents are extremely rare, but boats and trains can cause a bridge to collapse for different reasons. With trains, it's the high speed that can bring a bridge down. With boats, it's the heavy weight that can cause the collapse, even if they are moving very slowly when the crash happens.

The best way to avoid bridge failures is to plan for them. Modern technologies that detect structural weaknesses, safer working environments, and better designs can all help reduce these terrible accidents.

**A) From a, b, c or d, choose the correct answer. (5 x10= 50 Marks)**

**28.** What is the best title for the passage?

- a) Civil Engineers
- b) Bridge Collapses**
- c) Means of Transportation
- d) Destructive Earthquakes

**29.** The underlined word "**infrequent**" in the 3<sup>rd</sup> paragraph means:

- a) unreal
- b) invisible
- c) uncommon**
- d) incorrect

**30.** The underlined pronoun "**they**" in the 1<sup>st</sup> paragraph refers to:

- a) bridges**
- b) mountains
- c) other roads
- d) trucks and trains

**31.** According to the passage, when engineers understand why bridges fall down, they can:

- a) stop using boats and trains.
- b) create expensive transportation projects.
- c) stop designing bridges in earthquake zones.
- d) make changes in the designs, construction, and safety of future bridges.**

**32.** According to the passage, **ONE** of the following sentences is **TRUE**:

- a) All bridges are made of wood.
- b) Boat and train crashes never cause bridge collapses.
- c) Bridges are frequently damaged by earthquakes.
- d) Good planning is important to avoid bridge failures.**

**B) With reference to the passage, answer the following questions. (4 x 15 = 60 marks)**

33. In what way are bridges important?

**Bridges are important because they connect cars, trucks, and trains across water, mountains, or other roads.**

34. Why must bridge engineers, designers, and builders take their job seriously?

**Because bridge collapses can cause loss of life and serious damage to property.**

35. How could engineers avoid a bridge collapse due to earthquakes?

**By designing bridges that are more resistant to movement in earthquake zones.**

36. How can modern technology help reduce bridge accidents?

**By detecting structural weaknesses, improving designs, and creating safer working environments.**

**VII - SUMMARY MAKING (60 Marks)**

**Read the following passage, then do as required:**

It is hard to know where to start when beginning strength training. There are countless exercises that you can do. Some work with certain body types, while others don't. With some familiarity with the basics, you can begin to craft a routine to achieve your personal goals. Strength training should be part of your workout routine due to its numerous benefits. One benefit is building muscles and improving bone density. In addition, strength training increases the strength of ligaments and joint functioning. It can also help raise good cholesterol levels and lower blood sugar levels. Most people like strength training because of its most obvious benefit, which is having a slimmer appearance.

**In a paragraph of not more than FOUR sentences ONLY, summarise and paraphrase the above text in answer to the following question.**

**What are the benefits of strength training?**

**First, strength training helps build muscles and makes bones stronger and denser. Second, it also improves the strength of joints and ligaments. Third, it lowers blood sugar and improving cholesterol levels. Finally, it helps people achieve a slimmer and healthier appearance.**
