## B) Reading comprehension

### Read the following passage carefully, then answer the questions below:

Every day there is less and less space on Earth for trash to be buried. Yet, every day we make more and more trash and waste that have negative effect on the natural environment. What can we do? We can recycle some of our trash. Recycling means that the trash will be made into something new and useful that can be used again and again. Recycling helps the Earth in many ways. It saves space in trash dumps where trash is collected to be burnt. Half of everything that we put into dumps could be recycled instead of throwing it. In fact, most things which are made of paper, metal, aluminum, glass and plastic can be recycled. It also **reduces** pollution.

Paper can be grouped up and made into new paper. Steel and aluminum cans can be melted down and made into new cans. The same is true about glass bottles. This can be done over and over again. Recycling doesn't take as much energy as making these things the first time. So, by recycling we can use less of the Earth's fuel resources. **It** also helps save our natural resources such as wood and metals.

Plastic can be melted down, too. Then, it can be formed into park benches or furniture. Some people call plastic the wood of the future. Things made of plastic will last about 400 years even when they are outside in harsh weather. No wood can do that.

## VI-Reading Comprehension ( 16 marks )

### -Read the following passage carefully, then answer the questions below:

A grizzly bear hunts for fish in the river. A black rhinoceros runs across the plains of Africa. These animals share the Earth with us. They fascinate us with their beauty and we love learning about their habits. But just loving them is not enough. These animals are endangered. Many of them are dying, and without special care, they may someday disappear from Earth.

Africa was once filled with plenty of wild animals, but not anymore. One of these animals, the black rhinoceros, is powerful and can be dangerous. However, its strength can't always help it to escape hunters. Many hunters kill rhinos for their valuable horns. This has caused the black rhino to be placed on the endangered species list. The elephant is also endangered and is killed for its ivory tusks.

Unfortunately, it is people who cause many of the problems that animals face. We change and pollute their habitats. We hunt them for skins, tusks, furs, and horns. We destroy animals that get in the way of farming or building. And we remove them from their natural habitats and take them home as pets.

What can you do to help endangered animals? Make an effort to support zoos and wildlife groups. You can also be a smart shopper and never buy a pet that has been raised in the wilderness. If we allow even one species on Earth to die out, it affects other living things and changes our world.

We ordered different kinds of pancakes and the baby loved them. There was a lovely environment at the table and lots of smiles.
