**B. Reading Comprehension (16 marks)**

**Read the following passage, then answer the questions below:**

Galileo Galilei was born in the year 1564. He was born in the town of Pisa, in Italy. His father wanted him to be a doctor. Galileo was bored with school. The only subject he really liked was Math. Because he was doing well in math, Galileo said he could become a mathematician.

Galileo began experimenting with different things because he needed to earn money. He tried to come up with an invention he could sell for money. He invented something like a compass that could be used to measure land.

Galileo heard that a German scientist had invented something called a spyglass. The inventor was trying to keep it a secret. Galileo decided to work on one of his own. Within 24 hours, he had invented a telescope. It could **magnify** things to make them appear ten times larger than real life. One night, he pointed his telescope towards the sky. He made his first of many space observations. Everyone thought the moon was smooth. Galileo saw that **it** wasn't. The moon was covered in hills and holes.

As technology has improved, today, the telescope is a wonderful invention that enables us to see objects far, far away.

**a. Choose the correct answer from a, b, c and d: (6x 2= 12 Ms)**

9. The best title of this passage is:
- The Improvement of Technology
  - Galileo and his Telescope
  - Space Observations
  - An Italian City
10. The meaning of the underlined word " **magnify** " in the 3<sup>rd</sup> paragraph is:
- point to things
  - make things bigger
  - spy on things
  - make things smooth
