Read the following passage, and then answer the questions below:

The Great Pyramid at Giza is one of the world's most amazing landmarks. Rising high above the Sahara Desert in the Giza region of northern Egypt, the Great Pyramid stands some 450 feet into the **burning** desert sky and takes an area of 13 acres. The rough climate of the Sahara has actually caused the pyramid to shrink 30 feet from its original height. The pyramid was such an amazing achievement of engineering that it remained the tallest building in the world for over 3800 years! The entire pyramid was originally faced – covered - with polished limestone to make it shine brilliantly in the sun.

Most Egyptologists, scientists who study ancient Egypt, agree that the Great Pyramid was built around 2560 BC, a little more than 4,500 years ago. It took tens of thousands of workers twenty years to build. The pyramid contains over two million stone blocks. Although most of the blocks weigh two or three tons, some weigh up to 80 tons!

The Great Pyramid of Giza was built by the Pharaoh Khufu, to be one of the most magnificent tombs in the world. His advisor was the pyramid's architect. The Great Pyramid of Giza is the last remaining of the Seven Wonders of the World.

VI. Reading Comprehension (20 Marks)

Read the following passage carefully, then answer the questions below:

Every afternoon, as they were coming from school, the children used to go and play in the Giant's garden. It was a large lovely garden, with soft green grass. One day the Giant came back. When he arrived, he saw the children playing in the garden. "What are you doing here?" he screamed, and the children ran away. "I will allow nobody to play in it but myself," said the Giant. Therefore, he built a high wall all round it. The poor children had now nowhere to play.

Then the spring came, and all over the country, there were flowers blooming and little birds singing. Only in the garden of the Selfish Giant <u>it</u> was still winter. "I hope there will be a change in the weather," said the Selfish Giant. However, the weather never changed in his garden. Then one day, he heard a noise and went to see what was going on. He found the children playing and laughing in a beautiful field. The trees were so happy that the children came to play that they bloomed with flowers, and the birds sat on them and sang. "How selfish I have been!" the Giant said; "now I know why the spring would not come here. I will <u>knock down</u> the wall, and my garden shall be the children's playground for ever and ever." He was very sorry for what he had done.

VI – READING COMPREHENSION (20 Marks)

Read the following passage, the answer the questions below:

No wonder that salt has many uses in life. It is added to food, pickle and fish. It is also used to preserve some types of food. Adding too much salt to some dishes causes health problems such as kidney stone and high blood pressure, but still many people like it.

In fact, we don't know when man first began to use salt, but we know that it has been used in many different ways throughout history. People who lived over 3000 years ago ate salted fish. Thousands of years ago in Egypt, salt was used to **embalm** the dead. In the Roman Empire, one of the most important roads was the one that carried salt from the salt mines to Rome. Guards were kept along the route to protect it against its thieves.

Stealing salt was considered a major crime in the past. In the 18th century, if a person was caught stealing salt, he could be put in jail. The criminal's ear was cut off as a punishment for the crime he has committed. In the early days in the USA, salt was scarce. So the store-keeper was very careful with his salt. As <u>he</u> poured out salt for his customers, he did not like anyone to cross the floor of the store.
