II. Comprehension[6M]

Usually people sleep between seven and eight hours a day although some people need less than **this** some need more. One year old babies don't work, so they spend their time either sleeping or eating meals. Some adults on the other hand have trouble getting to sleep every night. Many people don't know why they are unable to sleep. Most people know that tea and coffee often make it difficult to go to sleep because they contain caffeine. Some medicines such as cold tablets also contain caffeine. Sleeping pills can help you fall asleep, but when you wake up the next morning, you'll feel tired.

You will sleep more easily if your bedroom is used only for sleeping. You shouldn't use your bedroom as an office, a TV room or an exercise room. You should also have a regular sleeping routine and not to go to bed until you're tired. Try to go to bed at the same time every night and get up at the same time every morning. Don't eat just before you go to bed, but try a warm glass of milk. If all this doesn't work, try counting sheep.

A) Choose the correct answer from a, b and c:[4x½=2M]

1. The main idea of the second paragraph is.....
a) the importance of sleeping. b) troubles people face during sleeping.
c) rules for having a good night sleep.
